Driving financial and supply chain performance

Transform information into actionable insight.

iViewer is a sophisticated yet easy-to-use reporting system that extends and enhances the power of ERP financial and materials management applications. By providing full, real-time visibility into your financial and materials management information, iViewer allows decision makers at all levels to see clearly and intuitively the nature of complex situations.

The result: actionable insight.

Used in conjunction with good accounting practices, iViewer enables you to make informed decisions faster. With complete drill-down capabilities from report rollup to journal entry, and through to vendor invoice and payment information, iViewer enables you to drive revenue improvement and increase supply chain efficiency. Ultimately, iViewer helps you achieve your mission to efficiently deliver quality care.

Advanced features at your fingertips.
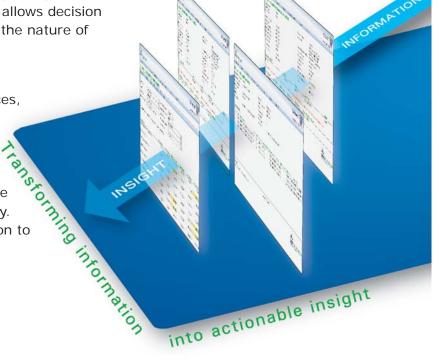

Flexible reporting:

- Executive dashboard
- Daily position statements
- Variance reports
- Interactive financial tools
- Productivity statements
- Custom report and query builder

Make informed decisions faster.

With full, real-time visibility into your financial and materials management information, your organization's leadership can clearly see the path to better asset efficiency and improved margins. Making iViewer a part of your financial ERP suite means:

- decision makers at all levels have the information they need to proactively make course corrections
- Faster decisions that improve margins and enhance efficiency
- Increased departmental information access
- Real-time intra-accounting period financial reporting
- Facilitates faster and easier financial close
- Enhanced budget process automation

Alter events before they're history.

Information is only useful if it is actionable. While some insight can be derived from analyzing historical data, only when you have access to information as it is created can you make real-time course corrections. iViewer brings you closer to real-time financials by providing on-demand access to information. Instead of waiting for reviews that take place at the close of an accounting period, now decision makers at all levels can securely review ongoing activity using a simple browser-based, point-and-click application.

Easy to use, easy to implement.

iViewer's simple, web-based interface is easy to learn and use, and provides a clear view into your organization's most complicated financial structures. Because iViewer leverages native data sources, you can rapidly integrate its powerful reporting features with your existing data sources across varying databases and hardware platforms. With minimal hardware requirements iViewer fits seamlessly into your ERP reporting portfolio.

About Us

DDR Technologies works with healthcare organizations to resolve complex ERP issues and leverage their investment in these critical systems. Our portfolio of decision support and data management products and services gives decision makers at all levels full visibility into financial and resource management information. It also gives them the ability to see clearly and intuitively into complex situations.

DDR has served more than 40 healthcare organizations. Our consultants average, more than 10 years of healthcare systems experience. Several are recognized as leading healthcare ERP systems experts, having worked with McKesson ERP solutions for more than 10 years.
